

## Six Fluid Genders

0. he/him is dead-nouns. i didnt like the expectations, assumptions, and implications. also i was ■■■■■■■■ about it.

1. any/all was fun but actually im just outsourcing my gender.

2. she/her was fine but didnt fit good either. More assumptions and expectations. i had a will to live now tho.

3. any/all again was fun but people mostly called me she and occasionally he, and never anything else...

4. but then, an older queer artists (for whom i have a shit ton of respect) told me they had assumed they/them for me... and that felt really right... but only for a while. i feel like they/them have gender ideals built from the negative image of two mainstream genders (man - masculinity = person).

5. so when the default options all got boring: did i reject material desire and attain Nirvana? no! i simply find more material to desire: enter xe/xir. surely this will make me happy.

6. damn it/it pronouns got hands
